

COMMERCIAL TAXES

The mission mode project for the computerization of the Commercial taxes has been successfully launched in Sikkim. It would now be possible to provide improved set of services to the dealers, while at the same time the efficiency of the commercial taxes administrations of the State Governments is expected to improve tremendously.

It would now be possible for dealers and stake holders to get all the e-services such as online registration, filing returns, getting way bills and c-forms as well as making all transactions and payments at the comfort of their homes.
